CHECKLIST

Export All Your NetSuite Data, and Keep It Usable

Moving to a new ERP, prepping for an audit or just want your financial history somewhere you control? NetSuite's built-in tools each get part of your data out. This checklist shows what each one misses, and what a complete export looks like.

1 What NetSuite's built-in options give you

Each tool is useful for something. None of them gives you a complete, current copy on its own.

Method	Gets every table?	Keeps attachments with records?	Stays current?	Usable after you leave?
Saved search exports	– Partial	x No	x No	x CSV only
Full CSV Export	– Most record types	x No	x No, one-time	x CSV only
SuiteAnalytics Connect	– Most records	x No	x Live only	x No access, ends with license
File cabinet downloads	– Files only	x No	x No	x Loose files
Sesame Software	– **Yes**	x **Yes**	x **Yes, scheduled**	x **Yes, your own database**

2 The complete export checklist

Whatever tools you use, aim for all six.

- [ ] Every table, including custom records and custom fields
- [ ] Record counts that reconcile back to NetSuite
- [ ] File Cabinet attachments, still linked to their records
- [ ] Refreshed on a schedule right up to cut-off
- [ ] Stored in a relational database you own (SQL Server, Snowflake, Oracle, PostgreSQL)
- [ ] Queryable by your reporting tools after the account is gone

Pro tip: if you can't check all six, you have an export, not a copy. The gaps usually show up during an audit or after your NetSuite access has ended.

3 Planning a NetSuite cut-off

Don't wait until the last week. Start with a full export, then keep it current.

1. **Full export**
   Weeks before cut-off
2. **Scheduled incremental pulls**
   Keep it current
3. **Final pull**
   After your last close
4. **Reconcile record counts**
   Prove nothing's missing
5. **Report from your own database**
   Long after the account is gone

Key reminder: once your NetSuite access ends, you can't go back for the table you forgot. Start early.

4 How Sesame Software handles NetSuite export

Every table, every attachment
Standard and custom records, saved searches and File Cabinet files.

Lands in a database you own
Runs on your infrastructure; your data never sits on our servers.

One-time or ongoing
Schedule exports from every few minutes to once a year.

Proof it's complete
Record counts and record-level auditing.

Connects the supported way
Through SuiteAnalytics Connect (JDBC) or SuiteTalk SOAP.

Flat pricing
NetSuite export starts at $5,000. No per-row or volume fees.

30+	15	SOC 2	1 vendor
years in enterprise data	patents	Type II certified	Salesforce, NetSuite, and your warehouse
